Forecast for Sunday 20 Nov 2022

Weather: The morning will start off dry with some sunshine, and just a few patches of cloud near summits. Cloud will then thicken from the west to bring some showers for a time around the middle of the day, these mainly light but of sleet or wet snow above 700m. Cloud will then break up again to bring some late sunshine then a dry and clear evening.

Chance of cloud-free hill tops above 700m: 80% or more, but falling 40% for a few hours around the middle of the day.

Low cloud and visibility: Patchy cloud above 700m but a spell of more extensive cloud to 600m for a few hours around the middle of the day and the odd patch to 500m. Visibility away from the cloud generally good but some brief reductions to moderate or poor in showers and very poor of course in the cloud.

Meteorologist's View

Highest summits will be around freezing all day with wind gusts possibly over 50mph bringing a severe chill.

Forecast for Monday 21 Nov 2022

Weather: After a mainly dry night cloud and outbreaks of rain will spread in around daybreak and then last for most of the day, accompanied by hill fog and strong winds. It may clear in the evening but with some uncertainty.

Maximum wind: East or southeast 40 gusts 55mph.

Chance of cloud-free hill tops above 700m: 60% overnight then 10% through daylight hours.

Low cloud and visibility: Patchy cloud overnight then extensive cloud at 500-750m with patches to 400m or less during the day, with poor visibility at lower levels due to the rain.

Temperature: **Valleys:** Plus 8 Celsius
At 700m: Plus 3 Celsius
Freezing level: Above the summits.
